CURRICULUM VITAE

PERSONAL INFORMATION

I am an ambitious person who always want to break the boundaries and achieve a cutting edge result. But what is my scope? My scope is to grow, to develop my skills to become a great programmer and, of course to socialise and make new friends.

EDUCATION

I have opted for the Computer Science as third discipline from the Bacalaureatte exam. My grade was 9.3 out of 10.

After that, I have started to follow several courses about data structures, algorithms and object oriented programming to achieve a solid foundation of Computer Science.

WORK EXPERIENCE

I have applied the concepts which I have learnt into my projects:
